Cobalt Strike With License Key Torrent.. the enterprise firewall infrastructure. -Q: I am getting null reference Exception during Null-safe cast I am getting null reference Exception while invoking findViewById(R.id.myDiv) in the second line of code which is written as a string. I have referred this link "Null safe casting with check" but in my case I am not aware of what to pass instead of the R.id.myDiv. I am using adt for it. It is showing following error. java.lang.NullPointerException: Attempt to invoke virtual method 'android.view.View android.view.View.findViewById(int)' on a null object reference Snippet is- TextView txtcnt = (TextView)findViewById(R.id.cntv); txtcnt.setText(String.valueOf(i)); A: You're getting the error because you can't pass R.id.myDiv as an argument to findViewById(). Because findViewById() is a static method, it takes zero arguments. The way you'd actually call the method is: findViewById(R.id.cntv); using System; using System.Collections.Generic; using System.ComponentModel; using System.Drawing; using System.Data; using System.Linq; using System.Text; using System.Threading.Tasks; using System.Windows.Forms; namespace MaterialSkin.Demo { public partial class Form1 : Form { public Form1() { InitializeComponent(); } private void button1\_Click(object sender, EventArgs e) { Image skin = LoadSkin(@"D:\test.png"); this.Button1.Image = skin; } }
