How can I get the existing action method to pass the new parameter and return the original result as well? public class HomeController : Controller { public IActionResult Index() { // How can I get this to return both the original result and the new result? return View(); } public IActionResult Test(IActionResult result) { //... } } A: In MVC 6 you can use the AttributeRouting and routes to achieve this. Here's a scenario in which you have a FooController with two actions Foo and FooBar. public class FooController : Controller {

Xcelerator Serial Key For PC

KeyMacro is an application that allows you to combine keystrokes to create Mac OS and Windows shortcuts. First things first, let's start off by explaining what this means in layman's terms. Keystrokes, as you might know, are the actions you can perform on a computer. All you have to do is type a string of letters or characters and hit enter to create the command you're looking for. When you're using your Mac or PC to perform regular tasks such as writing a letter or working on a document, you might wish to save the amount of time you spend typing by combining keystrokes together in a chain. For example, to create a shortcut for the "Save As" feature, you would type "Alt+S". Although there are many such shortcuts built into the system, you can create your own. For example, a shortcut for a folder named "Downloads" on your Mac might be created by combining the "Alt" key, the "S" key, the "C" key and the "P" key. Now that we've explained what it is, let's explain how KeyMacro can help you in creating shortcuts for various tasks on your Mac or PC. Tools KeyMacro comes with an easy to use interface that will allow you to assign keystrokes to create Mac and Windows shortcuts. It also has an editor where you can enter the commands you wish to combine in order to create shortcuts. You can even create a shortcut for an application or file you wish to download from the Internet. In order to create a shortcut in KeyMacro, you simply type the command you wish to create in the editor, hit "Command+Enter" or "Control+Enter" and then click on the "Create" button. A new menu will open on your computer which will list the different applications or documents that can be combined with your shortcuts. Now that you've created a shortcut, all you have to do is assign a keystroke to it. You can either do this manually by entering a shortcut or by assigning a specific keystroke to it. How to Create a Shortcut in KeyMacro To create a shortcut in KeyMacro, you need to follow a very easy set of steps. First of all, make sure that the program you wish to create the shortcut for is currently selected from the editor list and then hit the "Create Shortcut" button. If you wish to create a shortcut for 1d6a3396d6

Xcelerator With Product Key [Mac/Win]
