One of the most important things for a business owner to do is to have a good team of salespeople. As salespeople, we work hard to make our clients happy and get them to a point where they are willing to buy from our company. What a lot of salespeople don't realize is that we don't sell to our clients, we sell to ourselves. We're too close to our clients to have

Players use one or two hotbar skills to complete a variety of missions, and will be rewarded for the dialogue choices they make. The game is set in a fantasy medieval world inspired by Germanic mythologies, and contains considerable historical and geographical references to Norse history and world mythology. There are two possible endings, depending on the choice of player characters. The action-heavy combat is complemented by complex dialogue sequences that make for a game that's both challenging and interesting throughout. The in-game currency, Raging Glory Points, is used to purchase dialogue choices between characters. Players can earn RGP by completing in-game missions and quests. Through the use of RGP, players can purchase new playable characters with different character skills and endings. If you want to play new games, you should come here. Hiroshima 60 Years After. This is the first time the world is going to see the atomic devastation caused by the Hiroshima bomb and the city which witnessed that explosion of nuclear energy. Hiroshima has been filmed in 75 different sections. Its design resembles a city where one learns about the 'consequences' of a war between two nations. This appears to be a silent war with a few actions showing, sometimes perceptibly, how each of the various protagonists of this drama live. Photography and cinematography based on the full documentation of the atomic devastation of Hiroshima.Q: How to transform an SQL query into JSON-r? I am using sqoop-examples/json-r/jsonr-example to prepare data into JSON-r for ingestion into cassandra using sqoop. I want to learn how to replace the below SQL statement with JSON-r. SQL command: SELECT reduce(json_array_to_object(array('ignore')) -> 'ignore') as time_stamp Output of this SQL is: {"time_stamp":"2012-03-21T05:46:35.0Z"} A: /* Row written, new row mode, raw format, engine: default */ SELECT 'ignore' AS time_stamp UNION ALL SELECT reduce(json_array_to_object(array('ignore')) -> 'ignore') as time_stamp GROUP BY 1 Live example You need to tag down the difference between the UNION ALL and UNION statements. UNION are append/maintain the original output making it a reversal of the given query. That being said they are supposed to be used for debugging and testing to make sure that the original behaviour is what one wants to accomplish. The UNION ALL is for the case where one wants a new table with all the rows but with the same column structure. This is pretty straight-forward and something that may
