The Chase The Chase is a first-person survival horror game designed from the ground up for the PC. Intended as a spiritual successor to the renowned Silent Hill franchise, The Chase will be a darker game with no combat or puzzles. It will only be about survival and discovery. After the terrible events of Silent Hill: Homecoming, the game will take place 20 years later at the legendary Briggs mansion. The game will be set in the Northern British countryside, where an invasion of unknown threats have struck, leaving several towns and villages in ruins. Players will be able to explore the mansion, its surrounding areas and use collected items and items they find to survive against the onslaught of enemies. Part of first-person survival horror subgenre; The Chase will combine investigation and exploration aspects, along with the unique survival elements, to create a new and terrifying experience for PC players. Reception Despite it being an unfinished game, it has been received positively by critics and audiences, receiving a 9.3 score from Steam users. The game later won the 'Best Debut Game' award at the Independent Games Festival 2017. The independent games reviewer 'MrWhale' stated in his review of the game, "A complete trip down memory lane, The Chase will bring back all those memories, even if you've never played Silent Hill". Related Projects Development RAM Studios was founded in 2011 and is based in London. Their first release was "The Chase", a first-person survival horror game. The idea behind the game was actually inspired by the Silent Hill series, which had been a massive influence on Silent Hill: Homecoming. But the setting and design of the game was a different take on the series. Marketing They released a small teaser trailer on Twitter, and then the official launch trailer on YouTube.
