## Pakistan Penal Code 1860 Urdu.epub [EXCLUSIVE]

# [Download](#)

it is well known that the majority of our society is male dominated. due to such patriarchal tendencies, researchers have approached this gender imbalance in different ways. the prevalence of female-headed families is one of the common factors associated with gender imbalance in pakistan. determining the extent of this relationship is important for the application of such demographic information in terms of policy and planning. in this study, we tried to ascertain the relationship between the gender-specific population estimates for pakistan and the female-headed families in pakistan. in our empirical analysis, it is found that the percentage of female-headed families is higher in urban areas than rural areas. the percentage of female-headed families is also higher in the provinces of punjab and sindh than the provinces of balochistan, khyber pakhtunkhwa and islamabad. internet use has reached a critical mass in pakistan and most people have a computer, a mobile phone or a tablet. online access is often used to send, receive and read messages. this creates a unique opportunity to use the internet to deliver health education messages and services as such services are most effective when they are tailored to fit the needs of the target population. an internet-based service can provide a variety of user-friendly tools that could be incorporated into counseling, such as questionnaires, interactive games and music. most people are familiar with the internet, and this familiarity could make service providers more successful in delivering health information to users. internet service providers can also provide a way for people to learn about their rights, which is crucial if they are to take advantage of any services that are provided. thus, internet-based services should be an important component of the strategy for promoting good health in pakistan. this can be achieved by empowering communities to identify and implement their own culturally appropriate interventions. in this study, a set of data about online health information are collected from wikipedia to assess the status of online health information. the study focuses on the content, quality and accuracy of online health information in the health category of wikipedia.
