Expectations regarding the Master Collection have increased since the release of the first version of the program. I guess this is not surprising as for the past couple of years Photoshop users were faced with some serious problems with one of the most popular applications. I remember that I couldn't import digital images and even Adobe themselves brought the planned product to a standstill until someone managed to find the reason. Most likely the reason has to do with the fact that would cost a lot to develop a program so complex. Photoshop works in Photoshop Elements Mode and even master Collection is designed with master Collection. Because a marketing person at Adobe once brought a disk that had the "Master Collection" into a meeting with the developers me and Mike (the developer of Photoshop Elements). We had asked which software was going to be developed. He said that it will be high-end software. He gave in the meeting the disk with the trial version of Photoshop Elements with which the developers have been working for a long time. I was a bit surprised that if this is such a high-end program, why they downloaded a trial version of the application. Later I found that they had been working on it for such a long time that they only had a few trials and they were lost in the bug reports collection. In the second version I've decided to avoid installing the trial version. It is a very important decision as I was afraid that Adobe will remove the whole application at the first opportunity. The credit that goes to the developers goes to my husband, who was monitoring the process from the start. He was a loyal Photoshop user until he couldn't stand using it anymore, even if he discovered that it would not install properly. He was not pleased when I was ordering the software for myself, after my marriage. I've been editing and using Photoshop since the year of 2000 and I've decided to buy a license for myself and Premiere Elements, because I felt like I was the first and maybe the only Photoshop user in the world who managed to wait and buy the software. I proved that when Photoshop toured for a long time like I predicted. I was a very happy couple. My husband might not admit it, but I was the person who persuaded him to switch to Photoshop. He was a very reliable Photoshop user. My Windows only existed for work and for me to format my laptop, I was using a Linux operating system. He was not sure about Windows, therefore whenever we were planning to purchase a computer, I usually convinced him. I was happy being the only one.
